-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

2. Claim 1 is rejected under 35 U.S.C. 102(e) as being anticipated by Mehmet (USPN 6,857,648).

Mehmet shows a scooter with an accelerating device including a platform 18, a pedal 36 spring biased upwardly, a sector gear 48, a shaft a one-way ratchet gear set (between 49 and 36), an accelerating gear set 44, 58, and a rear wheel driven by pedal power.

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 3611

4. Claim 2 is rejected under 35 U.S.C. 103(a) as being unpatentable over Mehmet in view of Hammelmann.

Mehmet fails to show an arcuate pedal.

Hammelmann shows a pedal arm H that is arcuate.

It would have been obvious to one of ordinary skill in the art to provide the Mehmet scooter with an arcuate pedal, as shown by Hammelmann, in order to improve the appearance and adapt the shape to the requirements of the scooter design.

5. Claims 3 and 5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Mehmet in view of Cevolani (USPN 1,659,766).

Mehmet lacks the exact ratchet and planetary gearing arrangement as claimed.

Cevolani shows a pedal powered cycle with a ratchet assembly including spring biased blocks 23 as claimed. It also shows a planetary gearing arrangement including a fixed gear 10, planet gears 18, a planet carrier and a delivery gear 20.

It would have been obvious to one of ordinary skill in the art to provide the Mehmet scooter with ratchet and planetary gearing arrangements, as taught by Cevolani, in order to provide a compact and efficient drive arrangement.

6. Claim 4 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Chen shows a planetary accelerating gearing.

Smith, Wang, Freize, Gedeon, Lai, Carr, and Clements show vehicle accelerating devices.

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Anne Marie M. Boehler whose telephone number is 571-272-6641. The examiner can normally be reached on 7:30-5:00, Monday-Thursday, and alternate Fridays.
